

APPENDIX F

Appendix/Attachment Title

Bridges with Nonredundant Steel Tension Members (NSTMs)

Appendix/Attachment Revision and Year:

Version 1.0, 2023

Appendix/Attachment Introduction and Discussion

The NBIS require bridge-specific procedures be on file for bridges with NSTMs. SCDOT is required to have procedures for the inspection of a bridge with NSTMs in the Bridge File with NSTMs on plans and FPDs.

Due to their nature, NSTM inspections require more extensive planning and preparation. See Chapter 5 of the BIGD for applicable inspection procedures.

Information in Appendix F is current at the time of the publication of Technical Note 03 (TN03). Contact BMO for updated information.

Appendix/Attachment Description

The bridges shown in this Appendix are bridges which have NSTMs. This Appendix shall be maintained by the BIPM or BMO designee.

Bridges with Nonredundant Steel Tension Members
