

VOLVO INTERCHANGE PROJECT UPDATE

AUGUST 2018

PROJECT OVERVIEW

The SCDOT is constructing a new three-leg directional interchange along I-26 in Berkeley County, South Carolina. The interchange will provide access from I-26 to the new Volvo Car Drive which leads to Camp Hall Commerce Park and the Volvo facility. The new interchange will be located along I-26 at approximate mile marker 189 which is approximately two (2) miles east of SC 27/Ridgeville Road (exit 187) and approximately five (5) miles west of Jedburg Road (exit 194). The proposed interchange includes both at-grade and flyover ramps.

PROGRESS UPDATE

- ❖ Walls and support structures along Eastbound lanes are in place and ready for bridge girders to be erected over I-26 Eastbound.
- ❖ Drainage pipe installations are underway to promote stormwater runoff in various locations within

the project site.

- ❖ As ramps are built higher, additional erosion control measures have been installed to protect project from summer rainstorms.
