

# VOLVO INTERCHANGE PROJECT UPDATE

DECEMBER 2018

## PROJECT OVERVIEW

The SCDOT is constructing a new three-leg directional interchange along I-26 in Berkeley County, South Carolina. The interchange will provide access from I-26 to the new Volvo Car Drive which leads to Camp Hall Commerce Park and the Volvo facility. The new interchange will be located along I-26 at approximate mile marker 189 which is approximately two (2) miles east of SC 27/Ridgeville Road (exit 187) and approximately five (5) miles west of Jedburg Road (exit 194). The proposed interchange includes both at-grade and flyover ramps.

## PROGRESS UPDATE

- ❖ All beams are in place for the bridges over I-26. (see above image)
- ❖ New drainage pipes are being jacked underneath I-26 to avoid traffic disruptions.
- ❖ Concrete foundations, some as deep as 40 feet, are being installed to support sign structures.

Volvo Interchange team working on drainage pipes.

Installation of concrete foundations to support sign structures.
