

# VOLVO INTERCHANGE PROJECT UPDATE

JUNE 2018

## PROJECT OVERVIEW

The SCDOT is constructing a new three-leg directional interchange along I-26 in Berkeley County, South Carolina. The interchange will provide access from I-26 to the new Volvo Car Drive which leads to Camp Hall Commerce Park and the Volvo facility. The new interchange will be located along I-26 at approximate mile marker 189 which is approximately two (2) miles east of SC 27/Ridgeville Road (exit 187) and approximately five (5) miles west of Jedburg Road (exit 194). The proposed interchange includes both at-grade and flyover ramps.

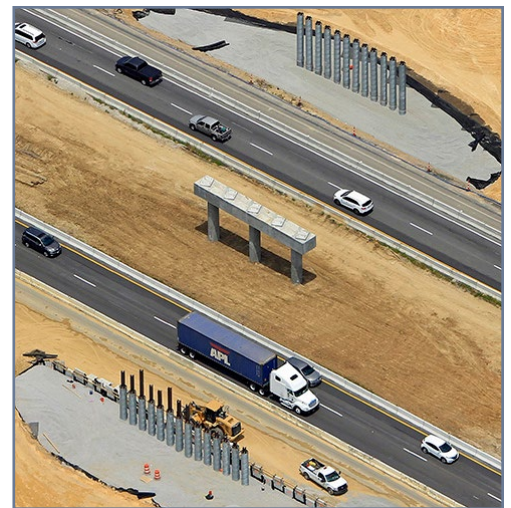

## PROGRESS UPDATE

- ❖ All bridge structures in the highway median are complete and ready to support the overpasses.
- ❖ The Mechanically Stabilized Earth (MSE) walls along I-26 Eastbound are near completion. These walls will retain the soil at the end of each bridge.
- ❖ Earthwork is progressing for the exit ramp from I-26 Westbound into the Volvo facility.
- ❖ The ramps continue to gain in elevation, incorporating state-of-the-art measures to ensure long-term stability.
