

# VOLVO INTERCHANGE PROJECT UPDATE

APRIL 2019

Visit the project website for up-to-date Traffic Alerts: <https://www.scdot.org/inside/volvo-interchange.aspx>

## PROJECT OVERVIEW

The SCDOT is constructing a new three-leg directional interchange along I-26 in Berkeley County, South Carolina. The interchange will provide access from I-26 to the new Volvo Car Drive which leads to Camp Hall Commerce Park and the Volvo facility. The new interchange will be located along I-26 at approximate mile marker 189 which is approximately two (2) miles east of SC 27/Ridgeville Road (exit 187) and approximately five (5) miles west of Jedburg Road (exit 194). The proposed interchange includes both at-grade and flyover ramps.

Concrete placement continues for the bridge decks.

## PROGRESS UPDATE

- ❖ 80% of the concrete for the three bridge decks has been placed.
- ❖ Overhead sign structures are being erected over I-26.
- ❖ Concrete flumes are being installed on slopes to channel stormwater.
- ❖ Asphalt crews have begun to pave the ramps.

The Volvo Interchange crew installs concrete flumes on slopes to aid in channeling stormwater.

Asphalt pavement is underway along the Volvo Interchange ramps.
